Message on Information Request:

## Review:

This quarterly report was submitted pursuant to NSPS Subpart Dc (40 CFR 60.48c). The reporting requirement in paragraph (e) states: "The owner or operator of each affected facility subject to the SO<sub>2</sub> emission limits, fuel oil sulfur limits, or percent reduction requirements under §60.43c shall keep records and submit reports as required under paragraph (d) of this section, including the following information, as applicable.

(e)(1) Calendar dates covered in the reporting period."

\*\*\*\*\*

"(11) If fuel supplier certification is used to demonstrate compliance, records of fuel supplier certification is used to demonstrate compliance, records of fuel supplier certification as described under paragraph (f)(1), (2), or (3) of this section, as applicable. In addition to records of fuel supplier certifications, the report shall include a certified statement signed by the owner or operator of the affected facility that the records of fuel supplier certifications submitted represent all of the fuel combusted during the reporting period.

(f) Fuel supplier certification shall include the following information:

(f)(1) For distillate oil:

(f)(1)(i) The name of the oil supplier; and

(f)(1)(ii) A statement from the oil supplier that the oil complies with the specifications under the definition of distillate oil in §60.41c."

\*\*\*\*\*

"(j) The reporting period for the reports required under this subpart is each six-month period. All reports shall be submitted to the Administrator and shall be postmarked by the 30th day following the end of the reporting period."

Monthly fuel use records under 40 CFR 60.48c(g) are not part of the reporting requirements.

The report covered the period 1/1/05-6/30/05. It included the daily amounts of oil burned in the boiler with a total of 1,745 gallons. The supplier of the diesel is Chevron Products Co. The sulfur content of the fuel is 0 to 0.5%, which is within the subpart Dc limit.

EMG spoke with Mr. Peranti by phone on 9/16/05. She requested that he submit the actual product data sheet or receipt for each batch of oil burned in the boiler, which contains a certification by the fuel supplier that the sulfur content in the oil is less than 0.5%. Mr. Peranti agreed to provide that information in the next 6 month report.

Send e-mail for no deficiencies.
